

# NX9 - Bounding Box

Watch this NX Tip Video:

NX has always had a bounding box function to determine the extremity of objects, however, it was only available to those with a wizard license (like Die, Electrode or Mold). NX9.0.2 and onwards now allow the 'Create Box' Bounding Box function to be used with a solid modeling license.

Learn How to use the Bounding Box Function now by viewing this month's Tip & Trick.
