

How to swap a license file

We often get asked the question of how to swap a license file. It may be additional bundles have been purchased, or you need to replace a temp license over.

Whatever the reason, if you're using a network license, it's a simple process to swap the license file over.

On your license server, start LMtools.

1. Go too Start/Stop/Reread
2. Click Stop Server
3. Click Config Services
4. Browse for the new license file (best to save in the same folder as the old one).
5. Click Save Service
6. Click Start/Stop/Reread
7. Click Start Server
